

## Add to Trusted Sites (Internet Explorer Only)

**Purpose:** If the user is able to access the Student Information System (SIS), but unable to click on any buttons, they may have to add the SIS to their trusted sites.

| Browser           | Action   |
|-------------------|--|
| Internet Explorer | <ul style="list-style-type: none"><li>• Select <b>Tools, Internet Options</b> from the menu bar or use the <b>Tools</b> drop-down menu in the upper right corner</li><li>• Click the <i>Security</i> tab</li><li>• Click the <b>Trusted Sites</b> icon, and then click the <b>Sites</b> button</li></ul>  |

| Browser | Action  |
|---------|---|
|         | <ul style="list-style-type: none"><li data-bbox="428 317 1396 384">• In the Trusted Sites box, add <a href="https://*.uni.edu">https://*.uni.edu</a> to the Add this website to the zone. Click the <b>Add</b> button.</li></ul> <div data-bbox="474 420 1089 972"></div> <div data-bbox="1109 478 1406 856"><p><b>Note:</b> In this example the site has already been added and the Trusted Sites is grayed out (not available). This means that this option is being centrally managed by your division tech support.</p></div> |
