Voice Commands

Using Android's built-in voice commands such as Google Assistant is a nice way to reduce the need to use your hands for phone access. Enabling Google Assistant is the first step to getting started with voice commands. To do this, open your Google app, then make sure Google Assistant (which is at the top of the screen) is switched to on. If you have not used it in a while and it is already3(ou)1in5e((3.3(e)-11 (is)7s80ot 12.3(ot u)12.3(s)7(e)2(d)2.3(y3.3(y)
